

AMY VILLA

SOFTWARE DEVELOPER | AI AUTOMATION & WORKFLOW SYSTEMS

Miami, Florida | amyv.dev@gmail.com | github.com/Amyvdev1

Native English & Spanish | U.S. work authorized; no sponsorship required

Technical portfolio & recruiter proof: amy-villa-signal-gallery.vercel.app/recruiter-proof

PROFESSIONAL SUMMARY

Software developer with 3+ years of hands-on experience across digital systems, AI-assisted workflow design, CRM-related process organization, content operations, and independent technical project development. Builds responsive React and TypeScript interfaces plus Python and FastAPI foundations with structured validation, workflow state, local persistence, focused checks, and visible human-review points. This experience is intentionally not presented as 3+ years of formal full-stack employment.

TECHNICAL SKILLS

Engineering: React | TypeScript | JavaScript | HTML5 | CSS3 | Python | FastAPI | Pydantic | SQLite | REST APIs | API Design | Request Validation | Git | GitHub | Docker | Focused Regression Testing | GitHub Actions

AI & Automation: ChatGPT | Gemini | Prompt Structuring | AI Agents | Chatbot Design | Make | Zapier | n8n | CRM Workflows | Google Forms | Google Sheets | WhatsApp Business

Web, Content & Operations: Responsive Web Design | Figma | Webflow | Framer | Hostinger | Video Editing | Short-Form Content | Canva | CapCut | QA | Documentation | Remote Collaboration

PROFESSIONAL EXPERIENCE

Freelance Digital Systems & Automation Developer

Management Services RT LLC · Florida, United States · January 2023–October 2025

- Built and supported AI-assisted workflows for recurring content operations, structured prompts, review checkpoints, and digital deliverable handoffs.
- Standardized brief-to-delivery processes through organized inputs, quality-review steps, workflow status, and visible next actions for remote workstreams.
- Organized CRM-related follow-up structures, documentation, and handoff context to make active digital work easier to track.
- Produced and reviewed English- and Spanish-language digital assets for accuracy, tone, and audience fit before delivery.

PUBLIC TECHNICAL PROJECTS

ForgeFlow AI Automation — Full-Stack Personal Code Sample | React, TypeScript, FastAPI, SQLite

- Built a workflow control-plane demo with validated inputs, persisted runs, optional Gemini execution, a transparent deterministic fallback, Docker configuration, focused backend/interface checks, and GitHub Actions CI.

Source: github.com/Amyvdev1/forgeflow-ai-automation

ClearRoute API — Public Personal Code Sample | Python, FastAPI, Pydantic

- Built a workflow API with typed validation, constrained task states, a demonstration role gate for approval/handoff, audit events, Docker configuration, 5 focused API tests, and GitHub Actions CI.

AccessPath Console — Public Accessibility-Practice Code Sample | React, TypeScript

- Built a keyboard-first workboard with semantic HTML, labelled form recovery, alert and live-status feedback, responsive layouts, 3 focused axe/Vitest checks, and GitHub Actions CI.

Signal Engine Portfolio — Published Technical Portfolio | React, TypeScript

- Built an interactive portfolio with workflow, API, customer-operations, and accessibility studies, source-level code tours, and a recruiter proof route explaining implementation boundaries and live walkthrough topics.

EDUCATION

Western Governors University (WGU) — Accelerated Information Technology Bachelor's and Master's Degree Program, In Progress (2026–Present)

Legacy Online School — High School Diploma, Completed 2026 | Relevant Coursework: AP Computer Science Principles; Foundations of Programming Honors
